

Superior performance problem-solving paints

# classidur<sup>+</sup>

A range of high performance interior paints developed to deal with the toughest problems. Specially formulated for renovation & new projects.

## Modern Plus

10ltrs (white)

A rapid hardening, white, matt, almost odour free solvent based paint with a special polymerised resin-based binder. Ideal for kitchen walls, industrial facilities, staircases and corridors in schools and colleges, offering high abrasion resistance and rapid drying.

- No primer or undercoat required
- Stain blocking
- Washable
- Rapid hardening
- Flat matt white finish

## Classidur Tradition

12.5ltrs (white)

A stain-blocking interior solvent-based paint with a totally matt finish that has been specially developed for the restoration of historic buildings including churches, castles and listed buildings.

- Resists new mould growth
- Rapid hardening
- Stain blocking

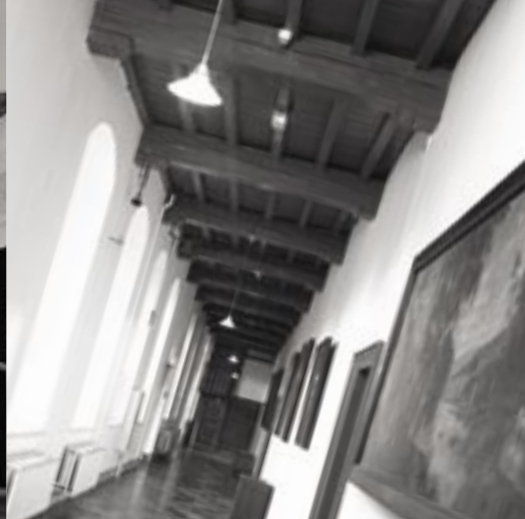

## Superclassic

4ltrs, 10ltrs (white)

An almost odour free, stain blocking solvent-based interior paint that can be applied over many surfaces. Ideal for ceilings and walls, Superclassic is recommended for renovation work, new quality work and as an all-in-one primer undercoat and finishing coat.

- Fast drying - apply 2nd coat within 2 hours
- Simple preparation - works over lime wash, distemper, plaster, wood and chalky substrates

All Classidur Paints in the range offer these benefits:

- Optimum stain blocking
- No risk of flaking (zero tension paint film)
- Virtually odour-free
- Minimal preparation work required - apply over problem substrates
- Perfect white finish

## Universal Primer

5ltrs (white)

A high performance stain blocking, water-based primer for universal use. Apply before any type of single component water- or solvent-based finish.

- Excellent adhesion
- Stain blocking
- For both interior and exterior use
- Compatible with any substrate
- Compatible with any type of finish
- Can be sanded
- Solvent-free cationic technology

## Aquaclass

5ltrs (white)

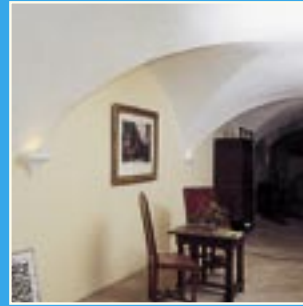

A virtually odour-free water-based interior paint that can be applied directly over most surfaces. Aquaclass is an all-in-one undercoat, stain blocker and matt finish, perfect for solvent-free renovation of walls and ceilings.

- Excellent stain blocking capability
- Covers soot, nicotine, tannins, dried water marks etc.
- Zero tension
- Excellent water vapour permeability
- 100% matt white finish
- Solvent-free cationic technology

## Solvent-Free Painting The Cationic Revolution

Universal Primer and Aquaclass are based on water-based Cationic C+ technology developed by Vernis Claessens SA. This provides increased technical benefits in terms of functionality and performance, whilst improving ease of application and levels of environmental and health protection.

# classidur<sup>+</sup>

Classidur is a range of high performance interior paints designed to solve everyday decorating problems with ease and economy. Swiss-made and internationally renowned, it is the uncontested specialist paint for interior restoration of the highest quality.

Unlike ordinary paints, every product in the Classidur range can be used as a primer, stain block and finish coat on the most challenging problem surfaces. Paints are available for tackling anything from water stains to nicotine, limewash, soot and fire-damaged surfaces without the need for washing down.

Classidur paints produce a flat white surface with a zero tension film meaning no risk of flaking. All of the paints are virtually odour-free meaning freshly painted areas can be used within hours - particularly beneficial in public buildings, schools, hospitals, public houses, restaurants and hotels.
