

# Atom Assembly Guide

Key features of the Atom:

Sucks gutters from the safety of the ground (even over awkward obstacles) / High Reach Internal Vacuuming / Wet and Dry Pick Up Indoors & Outdoors / Blow Function - Great for clearing Gutter Clutter & Ground Foli-

Insert the long flex hose cuff into the bottom vac port for suction power and in the top vacuum port for blow function feature

Connect poles together to your desired height

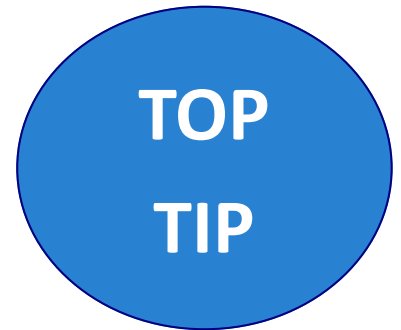

Push the flexible hose cuff over your bottom pole

Gutter cleaning End Tools fit into the Flexi Neck

Flexi Neck Tool Holders fit onto your top pole denoted by the orange band

Camera sits on top pole on flexi neck. Monitor sits on base pole

If vacuuming sludge or liquids remove the dust filter Always use filter if debris is dry, failure to do this will damage the motors

After every shift, clean the inside the tubes and flexi hose by sucking half a bucket of water up into the vac and empty. Please also see note in trouble shooting guide

Always wipe pole before inserting together to ensure there is no grit when being inserted

### GOOD PRACTISE

Clean the filter in your vacuum to keep good suction power.

To remove damp debris build up inside your suction hose tubes, have a bucket of water near by and occasionally suck water up during and after cleaning, especially if the debris is wet and sticky....

When connecting poles together ensure they are free from grit and debris to prevent premature wear. If they are dirty, place in bucket of water to clean prior to connecting

**FULLY** charge camera systems prior to use

|  | Remedy   |
|--|--|
| Blocked filter or full bin                             | Clean filter and empty bin   |
| Blockages in flexi neck or poles or vac entrance       | Clear blockages  |
| Leaves blocking at end tool                            | Tap leaves & end tool on roof tiles  |
| Blocked flexi neck                                     | Place end tool on roof and gently pull down to slightly straighten flexi bend to unblock |
| <b>Damp debris build up inside flexi hose of tubes</b> | <b>Suck water from bucket as per above image</b>   |
| Camera screen frozen: Lock out                         | Select reset button on back of monitor   |
