

### Description

Centrecoat Aerosol Tack Coat for Thermoplastic is designed for external use or internal car parks for use on concrete, old asphalt, block paving, tarmac and other stone surfaces.

Centrecoat Aerosol Tack Coat for Thermoplastic Road Lines has been designed to form a tacky adhesive coat for use with thermoplastic road markings and tapes to aid adhesion when applying thermoplastic lines with a gas torch. Thermoplastic lines can not be stuck down with this product alone. Centrecoat Aerosol Tack Coat is easy to use and doesn't make any mess during application. Centrecoat Aerosol Tack Coat for Thermoplastic is best used to help thermoplastic products adhere to the surface before application using a Thermoplastic Gas Torch.

### Application

Centrecoat Aerosol Tack Coat for Thermoplastic products is available in 750ml aerosol tins for quick and simple spray application. Centrecoat Aerosol Tack Coat has a theoretical coverage rate of 80 metres at 100mm width and 100 metres at 50mm width. Centrecoat Aerosol Tack Coat for Thermoplastic has a fast drying time of 10-15 minutes and should be applied to clean, dry and contaminant free surfaces. Surfaces to be tack coated should be clean, dry and dust free before applying Thermoplastic Line Tape.

### Surface and Environment

Centrecoat Aerosol Tack Coat for Thermoplastic is designed for external use or internal car parks for use on concrete, old asphalt, block paving, tarmac and other stone surfaces.
