Description

Centrecoat R04 BG Hard Landscape Cleaner is a high performance renovating cleaner formulated to remove organic and microbiological growth contaminants from porous hard ground surfaces such as natural stone, cement, tarmac, brick, clay, terracotta etc.

With the consistency of a light gel, this cleaner is designed to clean and protect surfaces from moss, lichen and algae. Does not contain solvents, acids or caustic soda.

► Professional strength
► Reduces on going maintenance costs
► Keeps working for up to 2 - 3 years

| Before Cleaning | During Cleaning | After Cleaning |

Suitable for cleaning many ground surfaces such as patios, forecourts, driveways, platforms, decking, steps, tennis courts and outdoor furniture.

Application

Test a small area prior to use. Protect areas not requiring treatment. Supplied ready to use. Apply neat product to dry or damp surfaces with a brush, roller or low pressure sprayer. Soak the complete area with a generous and even application. Leave for 20 to 90 minutes. Agitation with a scrubbing brus may enhance the cleaning action.

To brighten paths and patios, leave longer before rinsing (up to 8 hours).

Rinse with water, then allow to dry. If soiling is still present, a repeated application may be required. Ideally afterwards treat the cleaned surface with an anti fungal agent to limit regrowth afterwards.

Never mix or add any other cleaners or acid into the product.

Technical Data

► Odour: Characteristic
► pH: <12
► Soluable in water
► Specific Gravity: 1.09
► Colour: Pale Straw
► VOC: 0g/l

Coverage Rate

► For Heavy Soiling: 3m2 per litre
► For Light Soiling: 5m2 per litre

The more porous the substrate the lower the coverage rate will be.

Clean Up

Clean equipment with warm water.

Storage

Store away from frost and heat in a dry place. Store between 5 and 30°C.

Shelf Life

12 months from production batch date if kept in orginal container.
