

Description

Centrecoat R08 is a heavy duty general purpose hard surface cleaner. Contains surfactants and mild solvents that have been activated for the ultimate performance.

Centrecoat R08 will out perform products that contain caustic soda that damage the surface, cause future problems with adhesion and cause corrosion issues. Centrecoat R08 will clean and suspend dirt with ease via it's dirt defence technology.

Suitable for use on facade cladding, roof cladding, paths and driveways. Centrecoat R08 is also suitable for use as a PVC cleaner, removing grout blooms, removing light graffiti, and preparing substrates prior to painting. Centrecoat R08 is a great all round cleaner and degreaser.

Features

- Non caustic
- Biodegradable
- Cost effective
- Multi use
- Low VOC
- Low odour

Application

Always test on a small hidden area of the substrate prior to use. Apply a general even coat to the substrate. Do not let the product dry out. Leave 5 to 30 minutes until the product penetrates the dirt. Agitate the substrate with a brush. Rinse clean or wash down with a power jet.

Coverage Rate

- For General Soiling: 1 part R08 to 5 parts water
- For Extreme Soiling: 1 part R08 to 1 part water
- For Daily Cleaning: 1 part R08 to 10 parts water

Clean Up

Clean equipment with clean warm water.

Storage

Store away from frost and heat in a dry place. Store at temperatures between 5°C and 30°C.

Shelf Life

12 months from date of production when kept in original unopened container.

Packaging

Available in 1 and 5 Litres

Limitations

See safety data sheet prior to use.
