

Description

Centrecoat Composite Stair Tread Covers are manufactured from corrosion resistant Glass Reinforced Plastic (Fibreglass) and have been designed for easy installation onto existing concrete, timber or steel surfaces.

A hard-wearing Silicon Carbide Grit is applied to the top surface to provide an effective anti slip finish, which outperforms conventional aluminium or rubber material in terms of slip resistance.

- ▶ Anti slip
- ▶ High Strength
- ▶ Low Maintenance
- ▶ Fire retardant
- ▶ Corrosive resistant
- ▶ UV stable
- ▶ Chemical resistant
- ▶ Non-Conductive

Colour

Available in Black with Yellow Nose, Grey and Yellow.

Application

We strongly suggest you glue and screw this product in place.

Technical Data

The integral angular quartz gritted surface has been tested and certified in accordance with BS 7976-2.

It provides an exceptional level of slip resistance over its lifespan.

Lifespan depends on frequency of use.

Fibreglass products are resistant to a wide range of chemicals across a broad temperature spectrum

GRP is made using a number of different resin to achieve specific chemical resistant properties

All products contain Fire Resistant Additive resulting in a Euro Class 1 fire rating in accordance with ISO 9239-1 and ISO 11925-2. This performance is equivalent to ASTM E84 class 1 and BS 476 part 7 class 2 flame spread and in effect gives a 30 minute burn time on the material.

- ▶ Voltage Breakdown: 18K volts/mm
- ▶ Density: 2100 Kg per m³
- ▶ Thermal Expansion Factor: 12×10^{-6} mm / mm°C
- ▶ Operating Temperature: -100°C to 200°C

Packaging

Available in Various Sizes and Widths.
