

Description

Centrecoat Flexicoat Masonry Paint is an external water based smooth premium masonry paint with added P.T.F.E. Increased flexibility & dirt resistance helps protect against properties that experience harsh weather conditions & increased dirt pollution.

Centrecoat Flexicoat Masonry Paint utilises a tough acrylic binder system to give a durable hard wearing matt finish with superb opacity giving great depth of colour. For exterior application to brick, cement and plaster.

Colour & Finish

Standard colours and tints available. Matt finish.

Application

Apply via brush , roller, HVLP spray or airless spray. A 2 coat system is recommended, dependent on required finish.
