

### Description

Centrecoat R155 Fungicidal Paint Additive is formulated to be incorporated into water based paint products to prevent mould, algae and fungicidal growth.

Suitable for use in water based paints, varnishes, wood stains, coatings, mortars, grouts, adhesives and more.

Centrecoat R155 Fungicidal Paint Additive is ideal for use in areas of high humidity or where damp is apparent. Incorporating Centrecoat R155 Additive into your water based paint will help a surface to remain fresh over time, preventing unsightly mould growth and unpleasant aroma. Centrecoat R155 Fungicidal Paint Additive is sold in concentrate form providing long term protection against unsightly growth.

- Durable, powerful protects against mould and algae growth
- Cost effective
- Suitable for water based products such as emulsions, masonry paints, gloss & opaque wood finishes, varnishes, wood stains, grouts, mortars, plasters and adhesives

### Application

Shake the container well before use. Always test a small area before use to ensure compatibility, quality of performance and finish is acceptable.

For every 5 litre for internal water based products add 2x25ml doses. For exterior water based products add 4x25ml doses. Use only the dosage as stated.

Ensure thorough stirring immediately after addition. Clean tools and equipment immediately after use with water.

### Technical Data

- Physical state: Viscous liquid at 20°C
- Appearance: Colourless
- Odour: Characteristic
- Boiling Point: 100°C
- Solubility In Water (vol/vol): Fully soluble
- Flash Point: Not applicable
- pH: 7
- VOC: 0.0g/l

### Dosage

- For every 5 litre for internal water based products add 2x25ml additive
- For exterior water based products add 4x25ml additive

### Storage

Keep in a cool, dry place. Keep away from extreme cold. Do not store below 5°C.

### Shelf Life

24 months in unopened containers, stored in recommended conditions.

### Packaging

Available in 250ml.
