

#### Description

Centrecoat R14 is formulated to remove rust stains from delicate surfaces when other rust removers cannot be used due to their corrosive nature. Due to its neutral pH it allows for a wider range of uses. A blend of biodegradable detergents and Thioglycolic Acid Sodium salt.

Centrecoat 14 works by converting rust compounds in to a water soluble solution that will change colour on activation. After it has worked, the solution can be simply washed away with clean water. Suitable for use on marble, stone, wood, paint, fibreglass and concrete including polished surfaces.

#### Application

Always test first on the surface to establish the correct dwell time. This will ensure the underlying substrate is not affected. Shake well before use. Apply neat product generously to dry affected area. Leave to react. Once applied do not let the product dry out - reapply if the surface becomes dry. Rinse clean with plenty of water. For best results use diluted with cold water.

- ▶ For Light Staining - 10 minutes
- ▶ For Heavy Staining - Up to 2 hours

#### Technical Data

- ▶ Physical State: Liquid at 20°C
- ▶ Colour: Clear
- ▶ Colour Whilst Working: Dark Purple
- ▶ pH: Approx 7
- ▶ Density: Approx 1.11 Kg/l

Product Working On Carrera Marble

#### Coverage

3m<sup>2</sup> per litre. This figure is approximate and should be used only as a general guideline.

#### Clean Up

After use clean all tools and equipment with water.

#### Storage

Keep in a dry place (between 5°C and 35°C).

#### Shelf Life

24 months following the production date when kept in the original unopened container.

#### Packaging

Available in 250ml

#### Recommendations

Wear protective gloves and glasses, and appropriate clothing whilst using the product. Do not dilute or mix with another product. Do not allow the applied product to dry. Do not apply during rain or frost and when surface and air temperature is < 5°C and > 35°C.
