

APPLICATION INSTRUCTIONS - KEIM STS 7M

KEIM STS 7M is an environmentally friendly, non-hazardous paint stripper for the removal of existing acrylic-bound paints.

SURFACE PREPARATION

- Remove as much unstable material as possible using a stiff brush or scraper.
- Score the surface where there are multiple paint layers to assist penetration.

MATERIAL APPLICATION

1. Liberally brush apply KEIM STS 7M onto the surface. The layer of KEIM STS 7M should be thicker than the layer(s) of paint to be removed.
2. Cover the area using plastic film. KEIM STS 7M should not be allowed to dry out.
3. KEIM STS 7M can remain on the surface up to 30 hours, depending on the number and thickness of existing paint layers.
4. Remove plastic film and use a scraper, brush and warm water or a high-pressure hot water washer to remove paint residue.

NOTE: Protect surrounding materials. Wear light breathing masks, rubber gloves and eye protection during application and removal of KEIM STS 7M.
