

Case Study:

Canvas Interiors UK - Fire Escape Lobby

“I used the coo var sure grip paint on the floor in the fire escape lobby to car park. I cleaned the concrete floor thoroughly and applied two coats of sure grip. Very easy to use and apply even though it is a heavy duty paint. Definitely has given the floor a guaranteed anti slip surface. I would recommend it to anyone for areas to paint like this.”

Project: Canvas Interiors UK Fire Escpae Lobby

Products used: Suregrip Anti-Slip

Product Functions: Suregrip is a ready mixed, single pack aggregated floor paint. It provides a rough, anti-slip finish which helps to prevent slips and falls in areas with foot and light truck traffic. It is perfect for areas where slip resistance is required vsuch as ramps, walkways, steps, stairwells, car pits and around machinery. It is also suitable for internal and external use.

Surfaces Coated: Wood

Project Completed: Summer 2017
