

## Introduction

**Bird Brand Ecosote®** effectively preserves external timber to prevent against wet rot and decay. Ecosote is registered with the UK HSE as a wood preservative and surface biocide. The active ingredient is Di-Decyldimethyl Ammonium Chloride 0.598% W/W. It removes green algae growth on contact. Although it is water based, it penetrates timber just like a solvent based wood preservative.

## KEY BENEFITS

- **3 in 1** - removes green algae with no pre-treatment, colours and preserves.
- **Low Hazard Classification.**
- **Low VOC- Water based system.**
- **High level of penetration on dry timber (contains glycols).**
- **Higher fade resistance than gas oil based treatments/creosote.**
- **Pleasant low odour.**
- **Non-flammable and low environmental impact.**
- **Non hazardous for transport.**
- **Safer to bees (doesn't contains azoles).**
- **Easy to apply by brush, spray or dip. Coverage 3-5m<sup>2</sup> per litre.**
- **¾ M litres manufactured per year and sold in the UK since February 2009.**
- **Ready to use aqueous wood preservative and surface biocide based on Di-Decyldimethyl Ammonium Chloride 0.598% W/W.**
- **HSE Approved for use as a Wood Preservative & Surface Biocide under the UK Control of Pesticides Regulations COPR. HSE number 10432.**

**Ecosote Wood Preserver** is a ready to use wood preservative and surface biocide for use on exterior timbers. It penetrates into the timber without the need for solvents and can be used on sheds, fences and timbers where a creosote like finish is required. Regular use of Ecosote Wood Preserver will help deter against fungi, mould, lichen and algae on exterior timbers.
