Conforms to Regulation (EC) No. 1907/2006 (REACH), Annex II, as amended by Regulation (EU) No. 2020/878

SAFETY DATA SHEET

Brosteel Ultra 60

SECTION 1: Identification of the substance/mixture and of the company/ undertaking

| 1.1 Product identifier | |
|------------------------|-----------------------|
| Product name | : Brosteel Ultra 60 |
| Product description | : Coating. |
| Product type | : Liquid. |
| UFI | : 8KT5-73HV-NVFX-G8S0 |
| | |

1.2 Relevant identified uses of the substance or mixture and uses advised against

| Identified uses | | |
|------------------------------------|---|--|
| Industrial use Professional use | | |
| Uses advised against | Reason | |
| Consumer use | Product is not intended for consumer use. | |

1.3 Details of the supplier of the safety data sheet

| Bollom Fire Protection |
|--|
| Portobello Industrial Estate |
| Birtley |
| County Durham |
| United Kingdom |
| DH3 2RE |
| Telephone no.: +44 (0) 191 4106611 |
| Fax no.: +44 (0) 191 4920125 |
| enquiries@tor-coatings.com |
| e-mail address of person : rpmeurohas@rustoleum.eu responsible for this SDS |

1.4 Emergency telephone number <u>National advisory body/Poison Centre</u> <u>Supplier</u> <u>Telephone number</u> : +44 870 8200418 / +44 2038073798 <u>Hours of operation</u> : 24 / 7

SECTION 2: Hazards identification

2.1 Classification of the substance or mixture

Product definition : Mixture

Classification according to Regulation (EC) No. 1272/2008 [CLP/GHS]

Repr. 2, H361f

The product is classified as hazardous according to Regulation (EC) 1272/2008 as amended. See Section 16 for the full text of the H statements declared above. See Section 11 for more detailed information on health effects and symptoms.

2.2 Label elements Hazard pictograms

| Signal word | 1 | Warning |
|---|----|--|
| Hazard statements | 1 | Suspected of damaging fertility. |
| Precautionary statements | | |
| General | 1 | Not applicable. |
| Prevention | 1 | P280 - Wear protective gloves, protective clothing and eye or face protection. |
| Response | 1 | Not applicable. |
| Storage | 1 | P405 - Store locked up. |
| Disposal | 1 | P501 - Dispose of contents and container in accordance with all local, regional, national and international regulations. |
| Hazardous ingredients | 1 | melamine |
| Supplemental label elements | : | Contains a biocidal product. Contains 1,2-benzisothiazol-3(2H)-one and reaction mass of: 5-chloro-2-methyl-4-isothiazolin-3-one [EC no. 247-500-7] and 2-methyl-2H-isothiazol-3-one [EC no. 220-239-6] (3:1). May produce an allergic reaction. Warning! Hazardous respirable droplets may be formed when sprayed. Do not breathe spray or mist. |
| Supplemental label elements : Detergents - Regulation (EC) No 907/2006 | : | Not applicable. |
| Annex XVII - Restrictions on the manufacture, placing on the market and use of certain dangerous substances, mixtures and articles | : | Not applicable. |
| Special packaging requirem | en | <u>ts</u> |
| Containers to be fitted with child-resistant fastenings | : | Not applicable. |
| Tactile warning of danger | : | Not applicable. |
| 2.3 Other hazards | | |

Product meets the criteria for PBT or vPvB according to Regulation (EC) No. 1907/2006, Annex XIII

This mixture does not contain any substances that are assessed to be a PBT or a vPvB.

| Other hazards which do | : None known. |
|------------------------------|---------------|
| not result in classification | |

: 23/08/2021 Date

SECTION 3: Composition/information on ingredients

3.2 Mixtures

: Mixture

| Product/ingredient name | Identifiers | % | Regulation (EC) No. 1272/2008 [CLP] | Туре |

| | | | See Section 16 for the full text of the H statements declared above. | |

<u>Type</u>

[1] Substance classified with a health or environmental hazard

[2] Substance with a workplace exposure limit

[3] Substance meets the criteria for PBT according to Regulation (EC) No. 1907/2006, Annex XIII

[4] Substance meets the criteria for vPvB according to Regulation (EC) No. 1907/2006, Annex XIII

[5] Substance of equivalent concern

[6] Additional disclosure due to company policy

[*] The classification as a carcinogen by inhalation applies only to mixtures placed on the market in powder form containing 1% or more of titanium dioxide particles with diameter \leq 10 µm not bound within a matrix.

| SCL (Specific Concentration Limits) | |
|---|-----------------|
| 1,2-benzisothiazol-3(2H)-one | H317 = 0.05 % |
| reaction mass of: 5-chloro-2-methyl-4-isothiazolin-3-one [EC no. 247-500-7] and 2-methyl-2H-isothiazol-3-one [EC no. 220-239-6] (3:1) | H317 = 0.0015 % |

SECTION 3: Composition/information on ingredients

| ATE (acute toxicity estimates) Not applicable. | Not applicable. |
|---|----------------------------------|
| | Particle Size Not applicable. |

There are no additional ingredients present which, within the current knowledge of the supplier and in the concentrations applicable, are classified as hazardous to health or the environment, are PBTs, vPvBs or Substances of equivalent concern, or have been assigned a workplace exposure limit and hence require reporting in this section.

Occupational exposure limits, if available, are listed in Section 8.

SECTION 4: First aid measures

| 4.1 Description of first aid m | easures |
|--------------------------------|---|
| Eye contact | : Immediately flush eyes with plenty of water, occasionally lifting the upper and lower eyelids. Check for and remove any contact lenses. Continue to rinse for at least 10 minutes. Get medical attention if irritation occurs. |
| Inhalation | : Remove victim to fresh air and keep at rest in a position comfortable for breathing. If not breathing, if breathing is irregular or if respiratory arrest occurs, provide artificial respiration or oxygen by trained personnel. It may be dangerous to the person providing aid to give mouth-to-mouth resuscitation. Get medical attention. If unconscious, place in recovery position and get medical attention immediately. Maintain an open airway. Loosen tight clothing such as a collar, tie, belt or waistband. In case of inhalation of decomposition products in a fire, symptoms may be delayed. The exposed person may need to be kept under medical surveillance for 48 hours. |
| Skin contact | : Flush contaminated skin with plenty of water. Remove contaminated clothing and shoes. Continue to rinse for at least 10 minutes. Get medical attention. Wash clothing before reuse. Clean shoes thoroughly before reuse. |
| Ingestion | : Wash out mouth with water. Remove dentures if any. If material has been swallowed and the exposed person is conscious, give small quantities of water to drink. Stop if the exposed person feels sick as vomiting may be dangerous. Do not induce vomiting unless directed to do so by medical personnel. If vomiting occurs, the head should be kept low so that vomit does not enter the lungs. Get medical attention. Never give anything by mouth to an unconscious person. If unconscious, place in recovery position and get medical attention immediately. Maintain an open airway. Loosen tight clothing such as a collar, tie, belt or waistband. |
| Protection of first-aiders | : No action shall be taken involving any personal risk or without suitable training. It may be dangerous to the person providing aid to give mouth-to-mouth resuscitation. |

4.2 Most important symptoms and effects, both acute and delayed

Over-exposure signs/symptoms Eye contact : No specific data. Inhalation : Adverse symptoms may include the following: reduced foetal weight increase in foetal deaths skeletal malformations Skin contact : Adverse symptoms may include the following: reduced foetal weight increase in foetal deaths skeletal malformations Skin contact : Adverse symptoms may include the following: reduced foetal weight increase in foetal deaths skeletal malformations

| Ingestion | : Adverse symptoms may include the following: reduced foetal weight increase in foetal deaths skeletal malformations |
|---------------------------|--|
| 4.3 Indication of any imm | ediate medical attention and special treatment needed |
| Notes to physician | : In case of inhalation of decomposition products in a fire, symptoms may be delayed. The exposed person may need to be kept under medical surveillance for 48 hours. |
| Specific treatments | : No specific treatment. |
| | • |

SECTION 5: Firefighting measures

| 5.1 Extinguishing media | | |
|---|---|-----|
| Suitable extinguishing media | Use an extinguishing agent suitable for the surrounding fire. In case of fire, use I chemicals, CO2, alcohol resistant foam or water spray. | JRY |
| Unsuitable extinguishing media | water jet | |
| 5.2 Special hazards arising f | the substance or mixture | |
| Hazards from the substance or mixture | Fire will produce dense black smoke. Exposure to decomposition products may cause a health hazard. Appropriate breathing apparatus may be required. Cool closed containers exposed to fire with water. | |
| Hazardous combustion products | Decomposition products may include the following materials: carbon dioxide carbon monoxide nitrogen oxides phosphorus oxides halogenated compounds metal oxide/oxides | |
| 5.3 Advice for firefighters | | |
| Special protective actions for fire-fighters | Promptly isolate the scene by removing all persons from the vicinity of the incide there is a fire. No action shall be taken involving any personal risk or without sui training. | |
| Special protective equipment for fire-fighters | Fire-fighters should wear appropriate protective equipment and self-contained breathing apparatus (SCBA) with a full face-piece operated in positive pressure mode. Clothing for fire-fighters (including helmets, protective boots and gloves) conforming to European standard EN 469 will provide a basic level of protection chemical incidents. |) |
| Additional information | No unusual hazard if involved in a fire. | |
| | | |

SECTION 6: Accidental release measures

| 6.1 Personal precautions, pro | ote | ctive equipm | ent and emerger | icy procedu | ures | | | | |
|--------------------------------|-----|--|--|--|---|--|---------------|----------------------|------|
| For non-emergency personnel | : | Evacuate su entering. Do Provide ade | all be taken involv rrounding areas. o not touch or wall quate ventilation. | 6.2 Environmental precautions | : | and sewers. | sal of spilt materia Inform the releva wers, waterways, | ant authoritie | | | | | |
| Date of issue/Date of revision | | : 23/08/2021 | Date of previous is | sue : | 20/08/2021 | Ver | sion | : 2.01 | 5/17 |

SECTION 6: Accidental release measures

6.3 Methods and material for containment and cleaning up

| Small spill | : Stop leak if without risk. Move containers from spill area. Dilute with water and mop up if water-soluble. Alternatively, or if water-insoluble, absorb with an inert dry material and place in an appropriate waste disposal container. Dispose of via a licensed waste disposal contractor. |
|---------------------------------|---|
| Large spill | : Stop leak if without risk. Move containers from spill area. Approach the release from upwind. Prevent entry into sewers, water courses, basements or confined areas. Wash spillages into an effluent treatment plant or proceed as follows. Contain and collect spillage with non-combustible, absorbent material e.g. sand, earth, vermiculite or diatomaceous earth and place in container for disposal according to local regulations. Dispose of via a licensed waste disposal contractor. Contaminated absorbent material may pose the same hazard as the spilt product. |
| 6.4 Reference to other sections | : See Section 1 for emergency contact information. See Section 8 for information on appropriate personal protective equipment. See Section 13 for additional waste treatment information. |

SECTION 7: Handling and storage

The information in this section contains generic advice and guidance.

7.1 Precautions for safe handling

| Protective measures | : Put on appropriate personal protective equipment (see Section 8). Avoid exposure - obtain special instructions before use. Avoid exposure during pregnancy. Do not handle until all safety precautions have been read and understood. Do not get in eyes or on skin or clothing. Do not ingest. Avoid breathing vapour or mist. If during normal use the material presents a respiratory hazard, use only with adequate ventilation or wear appropriate respirator. Keep in the original container or an approved alternative made from a compatible material, kept tightly closed when not in use. Empty containers retain product residue and can be hazardous. Do not reuse container. |
|--|---|
| Advice on general occupational hygiene | : Eating, drinking and smoking should be prohibited in areas where this material is handled, stored and processed. Workers should wash hands and face before eating, drinking and smoking. Remove contaminated clothing and protective equipment before entering eating areas. See also Section 8 for additional information on hygiene measures. |

7.2 Conditions for safe storage, including any incompatibilities

Store between the following temperatures: 5 to 25°C (41 to 77°F). Store in accordance with local regulations. Store in original container protected from direct sunlight in a dry, cool and well-ventilated area, away from incompatible materials (see Section 10) and food and drink. Store locked up. Keep container tightly closed and sealed until ready for use. Containers that have been opened must be carefully resealed and kept upright to prevent leakage. Do not store in unlabelled containers. Use appropriate containment to avoid environmental contamination. See Section 10 for incompatible materials before handling or use.

7.3 Specific end use(s) Recommendations Industrial sector specific solutions

- : Not available.
- : Not available.

SECTION 8: Exposure controls/personal protection

The information in this section contains generic advice and guidance. Information is provided based on typical anticipated uses of the product. Additional measures might be required for bulk handling or other uses that could significantly increase worker exposure or environmental releases.

8.1 Control parameters

Occupational exposure limits

Recommended monitoring procedures If this product contains ingredients with exposure limits, personal, workplace atmosphere or biological monitoring may be required to determine the effectiveness of the ventilation or other control measures and/or the necessity to use respiratory protective equipment. Reference should be made to monitoring standards, such as the following: European Standard EN 689 (Workplace atmospheres - Guidance for the assessment of exposure by inhalation to chemical agents for comparison with limit values and measurement strategy) European Standard EN 14042 (Workplace atmospheres - Guide for the application and use of procedures for the assessment of exposure to chemical and biological agents) European Standard EN 482 (Workplace atmospheres - General requirements for the performance of procedures for the measurement of chemical agents) Reference to national guidance documents for methods for the determination of hazardous substances will also be required.

DNELs/DMELs

| Product/ingredient name | Туре | Exposure | Value | Population | Effects |
|-------------------------|------|-------------------------|---------------------|--------------------------------------|----------|
| melamine | DNEL | Long term Inhalation | 8,3 mg/m³ | Workers | Systemic |
| titanium dioxide | DNEL | Long term Inhalation | 10 mg/m³ | Workers | Local |
| | DNEL | Long term Oral | 700 mg/kg bw/day | General population [Consumers] | Systemic |

PNECs

| Product/ingredient name | Compartment Detail | Value | Method Detail |
|-------------------------|-----------------------|----------------|---------------|
| melamine | Fresh water | 0,64 mg/l | - |
| | Marine water | 0,064 mg/l | - |
| | Soil | 1,7 mg/kg dwt | - |
| | Sediment | 1,34 mg/kg dwt | - |
| titanium dioxide | Fresh water | 0,127 mg/l | - |
| | Marine | >1 mg/l | - |
| | Sewage Treatment | >100 mg/l | - |
| | Plant | | |
| | Fresh water sediment | >1000 mg/kg | - |
| | Marine water sediment | >100 mg/kg | - |
| | Soil | 100 mg/kg | - |

8.2 Exposure controls

Appropriate engineering controls
 If user operations generate dust, fumes, gas, vapour or mist, use process enclosures, local exhaust ventilation or other engineering controls to keep worker exposure to airborne contaminants below any recommended or statutory limits.

Individual protection measures

Hygiene measures: Wash hands, forearms and face thoroughly after handling chemical products,
before eating, smoking and using the lavatory and at the end of the working period.
Appropriate techniques should be used to remove potentially contaminated clothing.
Wash contaminated clothing before reusing. Ensure that eyewash stations and
safety showers are close to the workstation location.

SECTION 8: Exposure controls/personal protection

| Eye/face protection : | Safety eyewear complying with an approved standard should be used when a risk assessment indicates this is necessary to avoid exposure to liquid splashes, mists, gases or dusts. Use eye protection according to EN 166. If contact is possible, the following protection should be worn, unless the assessment indicates a higher degree of protection: safety glasses with side-shields. Recommended: safety glasses with side-shields (EN 166) |
|-----------------------|--|
|-----------------------|--|

Skin protection

There is no one glove material or combination of materials that will give unlimited resistance to any individual or combination of chemicals.

The breakthrough time must be greater than the end use time of the product.

The instructions and information provided by the glove manufacturer on use, storage, maintenance and replacement must be followed.

Gloves should be replaced regularly and if there is any sign of damage to the glove material.

Always ensure that gloves are free from defects and that they are stored and used correctly.

The performance or effectiveness of the glove may be reduced by physical/chemical damage and poor maintenance. Barrier creams may help to protect the exposed areas of the skin but should not be applied once exposure has occurred.

| Hand protection | Chemical-resistant, impervious gloves complying with an approved standard should be worn at all times when handling chemical products if a risk assessment indicates this is necessary. Considering the parameters specified by the glove manufacturer, check during use that the gloves are still retaining their protective properties. It should be noted that the time to breakthrough for any glove material may be different for different glove manufacturers. In the case of mixtures, consisting of several substances, the protection time of the gloves cannot be accurately estimated. > 8 hours (breakthrough time): nitrile rubber (0.5mm) |
|---------------------------------|--|
| | The recommendation for the type or types of glove to use when handling this product is based on information from the following source: EN374. The user must check that the final choice of type of glove selected for handling this product is the most appropriate and takes into account the particular conditions of use, as included in the user's risk assessment. |
| Body protection | : Personal protective equipment for the body should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product. Recommended: Wear overalls or long sleeved shirt. (EN 467) |
| Other skin protection | : Appropriate footwear and any additional skin protection measures should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product. |
| Respiratory protection | : Based on the hazard and potential for exposure, select a respirator that meets the appropriate standard or certification. Respirators must be used according to a respiratory protection program to ensure proper fitting, training, and other important aspects of use. Recommended: organic vapour (Type A) and particulate filter (as filter combination A-P2) (EN 140). |
| Environmental exposure controls | : Emissions from ventilation or work process equipment should be checked to ensure they comply with the requirements of environmental protection legislation. In some cases, fume scrubbers, filters or engineering modifications to the process equipment will be necessary to reduce emissions to acceptable levels. |

SECTION 9: Physical and chemical properties

The conditions of measurement of all properties are at standard temperature and pressure unless otherwise indicated.

9.1 Information on basic physical and chemical properties

| Physical state | : Liquid. |
|-----------------|-------------------|
| Colour | : White. |
| Odour | : Characteristic. |
| Odour threshold | : Not available. |

SECTION 9: Physical and chemical properties

| Melting point/freezing point | 0°C [Literature] | |
|--|--|-----|
| Initial boiling point and boiling range | >100°C (>212°F) [Literature] | |
| Flammability (solid, gas) | Non-flammable in the presence of the following materials or conditions: oper flames, sparks and static discharge, heat and shocks and mechanical impact Nonflammable, but will burn on prolonged exposure to flame or high temperative statements. | ts. |
| Upper/lower flammability or explosive limits | Not available. | |
| Flash point | Not relevant due to nature of the product. | |
| Auto-ignition temperature | Not relevant due to nature of the product. | |
| Decomposition temperature | Not available. | |
| рН | 8 to 9,5 [OECD 122] | |
| pH : Justification | Not available. | |
| Viscosity | Not available. | |
| Solubility(ies) | Soluble in the following materials: cold water and hot water. Very slightly soluble in the following materials: methanol and acetone. | |
| Solubility in water | Not available. | |
| Miscible with water | Yes. | |
| Partition coefficient: n-octanol/ water | Not applicable. | |
| Vapour pressure | 2,3 kPa (17,25 mm Hg) [Literature] | |
| Evaporation rate | <1 (butyl acetate = 1) | |
| Relative density | 1,35 to 1,45 | |
| Density | 1,38 g/cm³ [20°C (68°F)] [DIN 53217] | |
| Vapour density | >1 [Air = 1] | |
| Explosive properties | Not applicable. | |
| Oxidising properties | Not available. | |
| Particle characteristics | | |
| Median particle size | Not applicable. | |
| | | |

SECTION 10: Stability and reactivity

| 10.1 Reactivity | : | No specific test data related to reactivity available for this product or its ingredients. |
|--|---|---|
| 10.2 Chemical stability | : | The product is stable. |
| 10.3 Possibility of hazardous reactions | : | Under normal conditions of storage and use, hazardous reactions will not occur. |
| 10.4 Conditions to avoid | : | No specific data. |
| 10.5 Incompatible materials | : | No specific data. |
| 10.6 Hazardous decomposition products | : | Under normal conditions of storage and use, hazardous decomposition products should not be produced. If involved in a fire, toxic gases including CO, CO2 and smoke can be generated. |

SECTION 11: Toxicological information

11.1 Information on hazard classes as defined in Regulation (EC) No 1272/2008

Acute toxicity

| Product/ingredient name | Result | Species | Dose | Exposure |
|--|---------------------------------|-----------------------|------------|----------|
| melamine | LD50 Oral | Rat | 3161 mg/kg | - |
| tris(2-chloro-1-methylethyl) phosphate | LD50 Oral | Rat | 1500 mg/kg | - |
| titanium dioxide | LC50 Inhalation Dusts and mists | Rat | >6,82 mg/l | 4 hours |
| | LD50 Dermal | Rabbit | >10 g/kg | - |
| | LD50 Oral | Rat | >24 g/kg | - |
| 1,2-benzisothiazol-3(2H)- one | LC50 Inhalation Dusts and mists | Rat | 0,11 mg/l | 4 hours |
| | LC50 Inhalation Dusts and mists | Rat - Male, Female | 0,5 mg/l | 4 hours |
| | LD50 Oral | Rat - Male | 490 mg/kg | - |
| reaction mass of: 5-chloro- 2-methyl-4-isothiazolin- 3-one [EC no. 247-500-7] and 2-methyl-2H-isothiazol- 3-one [EC no. 220-239-6] (3: 1) | LC50 Inhalation Dusts and mists | Rat - Male, Female | 0,171 mg/l | 4 hours |
| · | LD50 Dermal | Rabbit | 92,4 mg/kg | - |
| | LD50 Oral | Rat | 64 mg/kg | - |

Conclusion/Summary : Based on available data, the classification criteria are not met.

Acute toxicity estimates

| Product/ingredient name | Oral (mg/ kg) | Dermal (mg/kg) | Inhalation (gases) (ppm) | Inhalation (vapours) (mg/l) | Inhalation (dusts and mists) (mg/l) |

SECTION 11: Toxicological information

| Ingestion | Adverse symptome may include the following: |
|---------------------------------|--|
| ingestion | : Adverse symptoms may include the following: reduced foetal weight |
| | increase in foetal deaths |
| | skeletal malformations |
| | |
| Delayed and immediate effect | ts as well as chronic effects from short and long-term exposure |
| <u>Short term exposure</u> | |
| Potential immediate effects | : Not available. |
| Potential delayed effects | : Not available. |
| Long term exposure | |
| Potential immediate | : Not available. |
| effects | |
| Potential delayed effects | : Not available. |
| Potential chronic health effe | <u>ects</u> |
| Not available. | |
| Conclusion/Summary | : Based on available data, the classification criteria are not met. |
| General | : No known significant effects or critical hazards. |
| Carcinogenicity | : No known significant effects or critical hazards. |
| Mutagenicity | : No known significant effects or critical hazards. |
| Reproductive toxicity | : Suspected of damaging fertility. |
| Endocrine disrupting properties | : Not available. |
| Other information | : Not available. |

SECTION 12: Ecological information

12.1 Toxicity

| Product/ingredient name | Result | Species | Exposure |
|---|--|---|----------|
| titanium dioxide | Acute LC50 3 mg/l Fresh water | Crustaceans - Ceriodaphnia dubia - Neonate | 48 hours |
| | Acute LC50 6,5 mg/l Fresh water | Daphnia spec Daphnia pulex - Neonate | 48 hours |
| | Acute LC50 >1000000 μg/l Marine water | Fish - Fundulus heteroclitus | 96 hours |
| 1,2-benzisothiazol-3(2H)-one | Acute EC50 0,067 mg/l | Algae - Pseudokirchneriella subcapitata | 72 hours |
| | Acute EC50 0,11 mg/l | Algae | 72 hours |
| | Acute EC50 0,9893 mg/l Marine water | Crustaceans - Opossum Shrimp | 96 hours |
| | Acute EC50 2,94 mg/l Fresh water | Daphnia spec. | 48 hours |
| | Acute LC50 8 to 13 mg/l | Fish - Alburnus alburnus | 96 hours |
| | Acute LC50 2,18 mg/l Fresh water | Fish | 96 hours |
| | Acute LC50 1,6 to 2,8 ppm Fresh water | Fish - Oncorhynchus mykiss | 96 hours |
| | Chronic NOEC 90 mg/l | Aquatic plants - Phaseolus vulgaris | 20 days |
| | Chronic NOEC 1,2 mg/l | Daphnia spec. | 21 days |
| | Chronic NOEC 0,21 mg/l | Fish | 28 days |
| | Chronic NOEL 0,0403 mg/l | Algae | 72 hours |
| reaction mass of: 5-chloro- 2-methyl-4-isothiazolin- | Acute EC50 0,037 mg/l Fresh water | Algae | 48 hours |
| 3-one [EC no. 247-500-7] and 2-methyl-2H-isothiazol- | | | |
| 3-one [EC no. 220-239-6] (3: 1) | | | |
| te efizzue (Dete efizzuizien | | . 00/00/0001 | |

SECTION 12: Ecological information

| Acute EC50 0,16 mg/l Fresh water | Daphnia spec. | 48 hours |
|------------------------------------|---------------|----------|
| Acute LC50 0,19 mg/l Fresh water | Fish | 96 hours |
| Acute NOEC 0,004 mg/I Marine water | Algae | 48 hours |
| Chronic NOEC 0,18 mg/l | Daphnia spec. | 21 days |
| Chronic NOEC 0,02 mg/l Fresh water | Fish | 38 days |

Conclusion/Summary : Based on available data, the classification criteria are not met.

12.2 Persistence and degradability

| Product/ingredient name | Test | Result | Dose | Inoculum |
|--|-----------|---|------|----------|
| 1,2-benzisothiazol-3(2H)-one reaction mass of: 5-chloro- 2-methyl-4-isothiazolin- 3-one [EC no. 247-500-7] and 2-methyl-2H-isothiazol- 3-one [EC no. 220-239-6] (3: | OECD 301D | >90 % - Readily - 1 days >60 % - Readily - 28 days | - | - |
| 1) | - | <50 % - 10 days | - | - |

Conclusion/Summary : This product has not been tested for biodegradation. Based on available data, the classification criteria are not met.

| Product/ingredient name | Aquatic half-life | Photolysis | Biodegradability |
|--|-------------------|------------|--------------------|
| 1,2-benzisothiazol-3(2H)-one reaction mass of: 5-chloro- 2-methyl-4-isothiazolin- 3-one [EC no. 247-500-7] and 2-methyl-2H-isothiazol- 3-one [EC no. 220-239-6] (3: 1) | - | | Readily Readily |

12.3 Bioaccumulative potential

| Product/ingredient name | LogPow | BCF | Potential |
|--|---------------|--------------------|------------|
| melamine tris(2-chloro-1-methylethyl) phosphate | -1,22 2,68 | <3.8 0.8 to 2.8 | low low |
| 1,2-benzisothiazol-3(2H)-one reaction mass of: 5-chloro- 2-methyl-4-isothiazolin- 3-one [EC no. 247-500-7] and 2-methyl-2H-isothiazol- 3-one [EC no. 220-239-6] (3: 1) | -0.83 to 0.75 | - | low low |

| 12.4 Mobility in soil | |
|---|-----------------------|
| Soil/water partition coefficient (K _{oc}) | : Not available. |
| Mobility | : Nonvolatile liquid. |

12.5 Results of PBT and vPvB assessment

This mixture does not contain any substances that are assessed to be a PBT or a vPvB.

| 12.6 Endocrine disrupting properties | : No known significant effects or critical hazards. |
|--------------------------------------|---|
| 12.7 Other adverse effects | : No known significant effects or critical hazards. |

Date of issue/Date of revision

: 23/08/2021

SECTION 13: Disposal considerations

The information in this section contains generic advice and guidance.

13.1 Waste treatment methods

| Product | |
|---------------------|---|
| Methods of disposal | : The generation of waste should be avoided or minimised wherever possible. Disposal of this product, solutions and any by-products should at all times comply with the requirements of environmental protection and waste disposal legislation and any regional local authority requirements. Dispose of surplus and non-recyclable products via a licensed waste disposal contractor. Waste should not be disposed of untreated to the sewer unless fully compliant with the requirements of all authorities with jurisdiction. |

Hazardous waste : Within the present knowledge of the supplier, this product is not regarded as hazardous waste, as defined by EU Directive 2008/98/EC.

European waste catalogue (EWC)

| Waste code | Waste designation |
|------------|---|
| 08 01 15* | aqueous sludges containing paint or varnish containing organic solvents or other hazardous substances |
| | This material and its container must be disposed of in a safe way. Care should be |

```
Special precautions
```

: This material and its container must be disposed of in a safe way. Care should be taken when handling emptied containers that have not been cleaned or rinsed out. Empty containers or liners may retain some product residues. Avoid dispersal of spilt material and runoff and contact with soil, waterways, drains and sewers.

SECTION 14: Transport information

| ADR/RID | ADN | IMDG | IATA |
|----------------|----------------|---|---|

IMPORTANT NOTE: The information in this Safety Data Sheet is based on the present state of knowledge and current legislation. It provides guidance on health, safety and environmental aspects of the product and should not be construed as any guarantee of technical performance or suitability for particular applications. The information contained in this data sheet (as may be amended from time to time) is not intended to be exhaustive and is presented in good faith and believed to be correct as of the date on which it is prepared. It is the user's responsibility to verify that this data sheet is current prior to using the product to which it relates. Persons using the information must make their own determinations as to the suitability of the relevant product for their purposes prior to use. Where those purposes are other than as specifically recommended in this safety data sheet, then the user uses the product at their own risk.

MANUFACTURER'S DISCLAIMER: the conditions, methods and factors affecting the handling, storage, application, use and disposal of the product are not under the control and knowledge of the manufacturer. Therefore the manufacturer does not assume responsibility for any adverse events which may occur in the handling, storage, application, use, misuse or disposal of the product and, so far as permitted by applicable law, the manufacturer expressly disclaims liability for any and all loss, damages and/or expenses arising out of or in any way connected to the storage, handling, use or disposal of the product. Safe handling, storage, use and disposal are the responsibility of the users. Users must comply with all applicable health and safety laws.

Final determination of suitability of any material is the sole responsibility of the user. All materials may present unknown hazards and should be used with caution. Although certain hazards are described herein, we cannot guarantee that these are the only hazards that exist.
