- » ULTRA LIGHTWEIGHT & DURABLE
- » CUSTOMISABLE HIGH ACCESS UP TO 40ft
- » COMPLETE SUCTION CONTROL
- » VERSATILE HIGH REACH SYSTEM

skyVac® Elite Vac Release Pole. Patent PENDING
Application No: GB1713830.6

skyVac® ELITE

THE ULTIMATE HIGH REACH CARBON FIBRE POLE SYSTEM

At 280gms per 1.5metres, a 1/3 of the weight of aluminium poles, these high-grade carbon fibre poles are ultra-lightweight and can be customised to reach cleaning projects up to 40ft, all from the safety of the ground. Rigid, durable, and easy to manoeuvre, this versatile high reach system makes light work of stubborn gutter blockages when used in conjunction with the SkyVac® Industrial 85 and Interceptor.

» ULTRA-LIGHT WEIGHT AND DURABLE

Engineered and extensively field tested, these poles are lightweight, rigid and easy to manoeuvre. Minimal weight coupled with greater control makes gutter clearing faster and less tiring.

» CUSTOMISABLE HIGH ACCESS UP TO 40FT

1.5M & 0.75M pole lengths can be securely clamped and locked together to achieve the perfect working height, whether working directly overhead or to reach over obstacles such as conservatories.

» COMPLETE SUCTION CONTROL

Operate the vacuum directly from the base of the pole with the patent pending Vac release cuff. Simply twist the cuff to cut the suction.

» VERSATILE HIGH REACH SYSTEM

A multi-function high reach cleaning system, thanks to the secure locking mechanism, SkyVac® Elite Poles can also be used for roof, windows, soffits and fascia cleaning unlike standard push fit poles. Simply and securely clamp the chosen end tool into a the pole using the Elite multi-connector. Also suitable for internal high level cleaning with the Industrial 85 Internal conversion kit.

LIGHTWEIGHT CARBON FIBRE - ONLY 280g PER 1.5m POLE

HIGH CLEARANCE CAPACITY - 50MM DIAMETER

SECURE LOCK MECHANISM

- » TOP - Robust clamp mechanism
- » BASE - Beveled to secure in place
