

SAFETY DATA SHEET 430/G150 - FARM OXIDE PROTECTIVE PAINT RED GREY GREEN

According to Regulation (EC) No 1907/2006, Annex II, as amended. Commission Regulation (EU) No 2015/830 of 28 May 2015.

SECTION 1: Identification of the substance/mixture and of the company/undertaking			
1.1. Product identifier			
Product name	430/G150 - FARM OXIDE PROTECTIVE PAINT RED GREY GREEN		
Product number	430/G150/65/328/86		
UFI	UFI: CE9P-X2WU-P002-9G6M		
1.2. Relevant identified uses of	of the substance or mixture and uses advis	ed against	
Identified uses	Paint.		
1.3. Details of the supplier of t	the safety data sheet		
Supplier	TEAL & MACKRILL LIMITED Lockwood Street HULL UK HU2 OHN +441482320194 (T) +441482219266 (F) info@teamac.co.uk	TEAL AND MACKRILL EU B.V. Zandvoorrtstaat 69 1976 BN IJMUIDEN THE NETHERLANDS +441482320194 (T) +441482219266 (F) info@teamac.co.uk	
Contact person	Technical Department -, 08.30 - 16.30 hrs Mon - Thurs, 08.30 - 15.00 hrs Fri, as above		
1.4. Emergency telephone number			
Emergency telephone	+44 (0) 1482 320194 Teamac (08.30 - 1	+44 (0) 1482 320194 Teamac (08.30 - 16.30 hrs Mon - Thurs, 08.30 - 15.00 hrs Fri)	
SDS No.	10579		
SECTION 2: Hazards identification			
2.1. Classification of the substance or mixture			
Classification (EC 1272/2008)	-		
Physical hazards	Flam. Liq. 3 - H226		
Health hazards	STOT SE 3 - H336		
Environmental hazards	Aquatic Chronic 3 - H412		
2.2. Label elements			
Hazard pictograms			
Signal word	Warning		
Hazard statements	H226 Flammable liquid and vapour. H336 May cause drowsiness or dizzines H412 Harmful to aquatic life with long las		

Precautionary statements	 P101 If medical advice is needed, have product container or label at hand. P102 Keep out of reach of children. P210 Keep away from heat, hot surfaces, sparks, open flames and other ignition sources. No smoking. P261 Avoid breathing vapour/ spray. P271 Use only outdoors or in a well-ventilated area. P273 Avoid release to the environment. P280 Wear protective gloves/ protective clothing/ eye protection/ face protection. P303+P361+P353 IF ON SKIN (or hair): Take off immediately all contaminated clothing. Rinse skin with water or shower. P305+P351+P338 IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing. P501 Dispose of contents/ container in accordance with national regulations.
Supplemental label information	EUH066 Repeated exposure may cause skin dryness or cracking.
Contains	HYDROCARBONS, C9-C11, <2% AROMATICS
Supplementary precautionary statements	P304+P340 IF INHALED: Remove person to fresh air and keep comfortable for breathing. P370+P378 In case of fire: Use foam, carbon dioxide, dry powder or water fog to extinguish. P403+P235 Store in a well-ventilated place. Keep cool.

2.3. Other hazards

This product does not contain any substances classified as PBT or vPvB.

SECTION 3: Composition/information on ingredients 3.2. Mixtures HYDROCARBONS, C9-C11, <2% AROMATICS 10-30% CAS number: ---EC number: 919-857-5 REACH registration number: 01-2119463258-33-XXXX Classification Classification (67/548/EEC or 1999/45/EC) Flam. The Full Text for all R-Phrases and Hazard Statements are Displayed in Section 16.

ures Move affected person to fresh air and keep warm and at rest in a position comfortable for preathing. Never give anything by mouth to an unconscious person. Remove affected person from source of contamination. Move affected person to fresh air and keep warm and at rest in a position comfortable for breathing. Get medical attention if any discomfort continues. Place unconscious person on their side in the recovery position and ensure breathing can take place. DO NOT induce vomiting. Get medical attention immediately. Move affected person to fresh air and keep warm and at rest in a position comfortable for breathing. Remove affected person from source of contamination. Remove contaminated clothing mmediately and wash skin with soap and water.
breathing. Never give anything by mouth to an unconscious person. Remove affected person from source of contamination. Move affected person to fresh air and keep warm and at rest in a position comfortable for breathing. Get medical attention if any discomfort continues. Place unconscious person on their side in the recovery position and ensure breathing can take place. DO NOT induce vomiting. Get medical attention immediately. Move affected person to fresh air and keep warm and at rest in a position comfortable for breathing. Remove affected person from source of contamination. Remove contaminated clothing
keep warm and at rest in a position comfortable for breathing. Get medical attention if any discomfort continues. Place unconscious person on their side in the recovery position and ensure breathing can take place. DO NOT induce vomiting. Get medical attention immediately. Move affected person to fresh air and keep warm and at rest in a position comfortable for breathing. Remove affected person from source of contamination. Remove contaminated clothing
air and keep warm and at rest in a position comfortable for breathing. Remove affected person from source of contamination. Remove contaminated clothing
mineulately and wash skin with soap and water.
Remove any contact lenses and open eyelids wide apart. Continue to rinse for at least 15 ninutes and get medical attention.
nd effects, both acute and delayed
Get medical attention promptly if symptoms occur after washing.
medical attention and special treatment needed
No specific recommendations.
res
Extinguish with foam, carbon dioxide, dry powder or water fog. Do not use water jet as an extinguisher, as this will spread the fire.
n the substance or mixture
Foxic gases or vapours. FLAMMABLE. Solvent vapours may form explosive mixtures with air.
Risk of re-ignition after fire has been extinguished. Cool containers exposed to flames with water until well after the fire is out. Avoid the spillage or runoff entering drains, sewers or watercourses.
Near positive-pressure self-contained breathing apparatus (SCBA) and appropriate protective clothing.

SECTION 6: Accidental release measures

6.1. Personal precautions, protective equipment and emergency procedures			
Personal precautions	Avoid inhalation of vapours and contact with skin and eyes. Provide adequate ventilation. No smoking, sparks, flames or other sources of ignition near spillage. Ensure suitable respiratory protection is worn during removal of spillages in confined areas.		
6.2. Environmental precautions	3		
Environmental precautions	Avoid discharge into drains or watercourses or onto the ground. Contain spillage with sand, earth or other suitable non-combustible material. Spillages or uncontrolled discharges into watercourses must be reported immediately to the Environmental Agency or other appropriate regulatory body.		
6.3. Methods and material for c	containment and cleaning up		
Methods for cleaning up	Eliminate all sources of ignition. No smoking, sparks, flames or other sources of ignition near spillage. Provide adequate ventilation. Avoid the spillage or runoff entering drains, sewers or watercourses. Absorb in vermiculite, dry sand or earth and place into containers. Collect and place in suitable waste disposal containers and seal securely. For waste disposal, see Section 13.		
6.4. Reference to other section	<u>IS</u>		
Reference to other sections	For personal protection, see Section 8.		
SECTION 7: Handling and stor	rage		
7.1. Precautions for safe handl	ing		
Usage precautions	Observe any occupational exposure limits for the product or ingredients. Avoid inhalation of vapours and spray/mists. Keep away from heat, sparks and open flame. Avoid spilling. Avoid contact with skin and eyes. Provide adequate ventilation. Avoid inhalation of vapours. Use approved respirator if air contamination is above an acceptable level. Do not eat, drink or smoke when using the product. The Manual Handling Operations Regulations may apply to the handling of containers of this product. To assist employers, the following method of calculating the weight for any pack size is given. Take the pack size volume in litres and multiply this figure by the specific gravity value given in section 9. This will give the net weight of the coating in kilograms. Allowance will then have to be made for the immediate packaging to give an approximate gross weight.		
7.2. Conditions for safe storage, including any incompatibilities			
Storage precautions	Store in closed original container at temperatures between 5°C and 25°C. Keep away from heat, sparks and open flame. Keep container tightly closed. Keep containers upright. Store away from the following materials: Oxidising materials. Alkalis. Acids.		
Storage class	Flammable liquid storage. The storage and use of this product is subject to the Dangerous Substances and Explosive Atmospheres Regulations (DSEAR). The requirements are given in the HSE Approved Code of Practice and Guidance, Storage of Dangerous Substances: DSEAR. Up to 250 litres of liquids with a flashpoint above 32C but below 55C may be kept in a workroom provided they are kept in closed containers in a marked, fire-resisting cupboard or bin. Larger quantities must be kept in a separate , marked storeroom conforming to the structural requirements contained in the HSE guidance note Storage of Flammable Liquids in Containers.		
7.3. Specific end use(s)			
Specific end use(s)	The identified uses for this product are detailed in Section 1.2.		

Usage description

Collect and place in suitable waste disposal containers and seal securely. Label the containers containing waste and contaminated materials and remove from the area as soon as possible.

SECTION 8: Exposure controls/Personal protection

8.1. Control parameters

Occupational exposure limits

Calcium Carbonate

Long-term exposure limit (8-hour TWA): WEL 10 mg/m³ inhalable dust Long-term exposure limit (8-hour TWA): WEL 4 mg/m³ respirable dust

Red Iron Oxide

Long-term exposure limit (8-hour TWA): WEL 4 mg/m³ respirable dust Short-term exposure limit (15-minute): WEL 10 mg/m³ as Fe

Barium Sulphate

Long-term exposure limit (8-hour TWA): 10 mg/m³ inhalable dust Long-term exposure limit (8-hour TWA): 4 mg/m³ respirable dust

TRIZINC BIS(ORTHOPHOSPHATE)

Long-term exposure limit (8-hour TWA): 10 mg/m³

Hydrocarbons, C10-C13, n-alkanes, isoalkanes, cyclics, <2% aromatics

Long-term exposure limit (8-hour TWA): WEL 1000 mg/m³

Dipropylene Glycol Methyl Ether

Long-term exposure limit (8-hour TWA): WEL 50 ppm 308 mg/m³ Sk

PHTHALIC ANHYDRIDE

Long-term exposure limit (8-hour TWA): WEL 4 mg/m3(Sen) Short-term exposure limit (15-minute): WEL 12 mg/m3(Sen) WEL = Workplace Exposure Limit. Sk = Can be absorbed through skin.

HYDROCARBONS, C9-C11, <2% AROMATICS

DNEL	Industry - Inhalation; Long term systemic effects: 1500 mg/m³ Consumer - Oral; Long term systemic effects: 300 mg/kg/day Consumer - Dermal; Long term systemic effects: 300 mg/kg/day Industry - Dermal; Long term systemic effects: 300 mg/kg/day Consumer - Inhalation; Long term systemic effects: 900 mg/m³
PNEC	No PNEC available. Substance is a hydrocarbon UVCB. Standard tests for this endpoint are intended for single substances and are not appropriate for the risk assessment of this complex substance.

TRIZINC BIS(ORTHOPHOSPHATE) (CAS: 7779-90-0)

DNEL	 Inhalation; : 1.0 soluble Zn mg/m³ Consumer - Oral; Long term systemic effects: 0.83 mg/kg/day Inhalation; : 5.0 insoluble Zn mg/m³ Consumer - Inhalation; Long term systemic effects: 2.5 mg/m³ Professional - Inhalation; Long term systemic effects: 5 mg/m³ Consumer - Dermal; Long term systemic effects: 83 mg/kg/day Professional - Dermal; Long term systemic effects: 83 mg/kg/day Fresh water; 0.02 Zn mg/l marine water; 0.006 Zn mg/l Sediment (Freshwater); 117.8 mg/kg
	- Sediment (Marinewater); 56.5 Zn mg/kg - Soil; 35.6 Zn mg/kg - STP; 0.1 Zn mg/l
Hydro	carbons, C10-C13, n-alkanes, isoalkanes, cyclics, <2% aromatics
Ingredient comments	WEL = Workplace Exposure Limits
	Dipropylene Glycol Methyl Ether (CAS: 34590-94-8)
DNEL	Industry - Dermal; Long term : 65 mg/kg/day Industry - Inhalation; Long term : 310 mg/m ³ Consumer - Dermal; Long term : 15 mg/kg/day Consumer - Inhalation; Long term : 37.2 mg/m ³ Consumer - Oral; Long term : 1.67 mg/kg/day
PNEC	Fresh water; 19 mg/l marine water; 1.9 mg/l STP; 4168 mg/l Sediment (Freshwater); 70.2 mg/kg Sediment (Marinewater); 7.02 mg/kg Soil; 2.74 mg/kg Intermittent release; 19 mg/l
	Calcium bis(2-ethylhexanoate) (CAS: 136-51-6)
DNEL	Workers - Dermal; Long term systemic effects: 5.67 mg/kg Workers - Inhalation; Long term systemic effects: 39.98 mg/m ³ General population - Oral; Long term systemic effects: 2.83 mg/kg General population - Dermal; Long term systemic effects: 2.83 mg/kg General population - Inhalation; Long term systemic effects: 9.86 mg/m ³
PNEC	STP; 71.7 mg/l Soil; 1.06 mg/kg Intermittent release; 0.493 mg/l Fresh water; 0.36 mg/l marine water; 0.036 mg/l Sediment (Freshwater); 6.37 mg/kg Sediment (Marinewater); 0.637 mg/kg
ure controls	-

8.2. Exposure controls

Appropriate engineering controls	Provide adequate ventilation. Good general ventilation should be adequate to control worker exposure to airborne contaminants. Personal, workplace environment or biological monitoring may be required to determine the effectiveness of the ventilation or other control measures and/or the necessity to use respiratory protective equipment. Use process enclosures, local exhaust ventilation or other engineering controls as the primary means to minimise worker exposure. Personal protective equipment should only be used if worker exposure cannot be controlled adequately by the engineering control measures. Ensure control measures are regularly inspected and maintained. Ensure operatives are trained to minimise exposure.
Eye/face protection	Eyewear complying with an approved standard should be worn if a risk assessment indicates eye contact is possible. Personal protective equipment for eye and face protection should comply with European Standard EN166. Unless the assessment indicates a higher degree of protection is required, the following protection should be worn: Tight-fitting safety glasses.
Hand protection	To protect hands from chemicals, gloves should comply with European Standards EN388 and 374. As a general principle, exposure should be managed by means other than the provision of protective gloves. Manufacturers' performance data suggest that the optimum glove for use should be: Wear protective gloves made of the following material: Nitrile rubber. Thickness: ≥ 0.31 mm Permeation breakthrough time according to EN374 - class: (1-6) e.g. minimum 480 mins. Caution: The performance of gloves under actual working conditions can be significantly affected by many factors and the information provided according to EN374 may not accord with what is achieved in practice. We recommend that expert professional advice is sought that takes into account of the work processes and working environment applicable for each task where gloves are to be worn.
Other skin and body protection	Wear appropriate clothing to prevent repeated or prolonged skin contact.
Hygiene measures	Good personal hygiene procedures should be implemented. Wash at the end of each work shift and before eating, smoking and using the toilet. When using do not eat, drink or smoke. Wash contaminated clothing before reuse.
Respiratory protection	Ensure all respiratory protective equipment is suitable for its intended use and is 'CE'-marked. Check that the respirator fits tightly and the filter is changed regularly. Gas and combination filter cartridges should comply with European Standard EN14387. Full face mask respirators with replaceable filter cartridges should comply with European Standard EN136. Half mask and quarter mask respirators with replaceable filter cartridges should comply with European Standard EN140. Respiratory protection must be used if the airborne contamination exceeds the recommended occupational exposure limit. Wear a respirator fitted with the following cartridge: Gas filter, type A2.
Environmental exposure controls	Keep container tightly sealed when not in use. Emissions from ventilation or work process equipment should be checked to ensure they comply with the requirements of environmental protection legislation. In some cases, fume scrubbers, filters or engineering modifications to the process equipment will be necessary to reduce emissions to acceptable levels.

SECTION 9: Physical and chemical properties

9.1. Information on basic physical and chemical properties		
Appearance	Viscous liquid. Coloured liquid.	
Colour	Red. Grey. Green.

Chemical stabilityStabilityStabilityStability of hazardous reactionsPossibility of hazardousNot determined.
SECTION 10: Stability and reactivity 10.1. Reactivity Reactivity There are no known reactivity hazards associated with this product. 10.2. Chemical stability Stable at normal ambient temperatures and when used as recommended. Stability of hazardous reactions Not determined.
10.1. Reactivity Reactivity There are no known reactivity hazards associated with this product. 10.2. Chemical stability Stability Stability Stable at normal ambient temperatures and when used as recommended. 10.3. Possibility of hazardous reactions Not determined.
Reactivity There are no known reactivity hazards associated with this product. 10.2. Chemical stability Stability Stability Stable at normal ambient temperatures and when used as recommended. 10.3. Possibility of hazardous reactions Not determined.
10.2. Chemical stability Stability Stability Stability of hazardous reactions Possibility of hazardous Not determined.
Stability Stable at normal ambient temperatures and when used as recommended. 10.3. Possibility of hazardous reactions Not determined.
10.3. Possibility of hazardous reactions Possibility of hazardous Not determined.
Possibility of hazardous Not determined.
•
10.4. Conditions to avoid
Conditions to avoidAvoid heat, flames and other sources of ignition. Avoid contact with the following materials: Acids. Oxidising agents.
10.5. Incompatible materials
Materials to avoid Strong alkalis. Strong acids. Strong oxidising agents.
10.6. Hazardous decomposition products

SECTION 11: Toxicological information

11.1. Information on toxicological effects

Inhalation	Vapour from this product may be hazardous by inhalation. Vapour may irritate respiratory system/lungs.
Ingestion	Liquid irritates mucous membranes and may cause abdominal pain if swallowed.
Skin contact	Product has a defatting effect on skin. Repeated exposure may cause skin dryness or cracking. May cause allergic contact eczema. Prolonged or repeated exposure may cause severe irritation.
Eye contact	May cause temporary eye irritation.
Acute and chronic health hazards	This product has low toxicity. Only large quantities are likely to have adverse effects on human health.
Route of exposure	Inhalation Skin absorption. Ingestion. Skin and/or eye contact.
Medical considerations	Skin disorders and allergies. Avoid vomiting and stomach flushing because of the risk of aspiration.

Toxicological information on ingredients.

HYDROCARBONS, C9-C11, <2% AROMATICS

Acute toxicity - oral	
Acute toxicity oral (LD₅₀ mg/kg)	5,100.0
Species	Rat
ATE oral (mg/kg)	5,100.0
Acute toxicity - dermal	
Acute toxicity dermal (LD₅₀ mg/kg)	5,100.0
Species	Rabbit
ATE dermal (mg/kg)	5,100.0
Acute toxicity - inhalation	
Acute toxicity inhalation (LC₅₀ vapours mg/l)	5,100.0
Species	Rat
ATE inhalation (vapours mg/l)	5,100.0
Skin corrosion/irritation	
Skin corrosion/irritation	Not irritating.
Serious eye damage/irritatio	on
Serious eye damage/irritation	Not irritating.
Respiratory sensitisation	
Respiratory sensitisation	Not sensitising.

Skin sensitisation	
Skin sensitisation	Not sensitising.
Germ cell mutagenicity	
Genotoxicity - in vitro	Chromosome aberration: Negative. This substance has no evidence of mutagenic properties.
Carcinogenicity	
Carcinogenicity	Based on available data the classification criteria are not met.
Reproductive toxicity	
Reproductive toxicity - fertility	Fertility: - , Inhalation, Rat This substance has no evidence of toxicity to reproduction.
Reproductive toxicity - development	Developmental toxicity: - : , Inhalation, Rat This substance has no evidence of toxicity to reproduction.
Specific target organ toxicit	y - repeated exposure
STOT - repeated exposure	Not available.
Aspiration hazard	
Aspiration hazard	Kinematic viscosity <= 20.5 mm2/s.
Inhalation	Vapours may cause drowsiness and dizziness. Central nervous system depression.
Ingestion	Harmful: danger of serious damage to health by prolonged exposure if swallowed.
Skin contact	Product has a defatting effect on skin. May cause allergic contact eczema.
Eye contact	No specific health hazards known.
Route of exposure	Inhalation Dermal
12: Ecological information	

Ecotoxicity

SECTION

The product contains a substance which is harmful to aquatic organisms and which may cause long term adverse effects in the aquatic environment.

12.1. Toxicity

Ecological information on ingredients.

HYDROCARBONS, C9-C11, <2% AROMATICS

Acute aquatic toxicity	
Acute toxicity - fish	LC50, > 96 hours: 1000 mg/l, Oncorhynchus mykiss (Rainbow trout) Substance did not cause acute toxicity to fish
Acute toxicity - aquatic invertebrates	Substance did not cause acute toxicity to the freshwater invertebrates EC_{50} , 48 hours: >1000 mg/l, Daphnia magna
Acute toxicity - aquatic plants	EC₅₀, > 72 hours: 1000 mg/l, Freshwater algae Substance did not cause acute toxicity to the freshwater green algae
Acute toxicity - microorganisms	EC₅₀, >: 100 mg/l, Activated sludge
Chronic aquatic toxicity	

Chronic toxicity - fish early NOEC, 28 days: 0.131 mg/l, Oncorhynchus mykiss (Rainbow trout) life stage

Chronic toxicity - aquatic NOEC, 28 days: 0.23 mg/l, Daphnia magna **invertebrates**

12.2. Persistence and degradability

Persistence and degradability The product is not expected to be biodegradable.

Ecological information on ingredients.

HYDROCARBONS, C9-C11, <2% AROMATICS

	Persistence and degradability	The product is readily biodegradable.
	Phototransformation	Oxidises rapidly by photo-chemical reactions in air
	Biodegradation- 80 Degradation (%): 28 daysTest - 301F Ready Biodegradability - Manometric Respiratory Test	
12.3. Bioaco	cumulative potential	
Bioaccumul	ative potential The p	roduct contains potentially bioaccumulating substances.
Partition coe	Partition coefficient Not determined.	
Ecological i	nformation on ingredients	
		HYDROCARBONS, C9-C11, <2% AROMATICS
Bioaccumulative potential The product contains potentially bioaccumulating substances.		
	Partition coefficient	log Pow: 5 - 6.7
12.4. Mobili	ty in soil	
Mobility	The p	roduct contains volatile organic compounds (VOCs) which will evaporate easily from all

Ecological information on ingredients.

surfaces.

HYDROCARBONS, C9-C11, <2% AROMATICS

Mobility	The product contains volatile organic compounds (VOCs) which will evaporate easily from all surfaces. Readily absorbed into soil.
Adsorption/desorption coefficient	Not available.
Surface tension	24.5 mN/m @ 20°C

12.5. Results of PBT and vPvB assessment

Results of PBT and vPvB This product does not contain any substances classified as PBT or vPvB. assessment

Ecological information on ingredients.

HYDROCARBONS, C9-C11, <2% AROMATICS

Results of PBT and vPvB This substance is not classified as PBT or vPvB according to current EU criteria. assessment

12.6. Other adverse effects

Other adverse effects

The product contains volatile organic compounds (VOCs) which have a photochemical ozone creation potential.

Ecological information on ingredients.

HYDROCARBONS, C9-C11, <2% AROMATICS

Other advers	se effects Not known.
SECTION 13: Disposal co	onsiderations
13.1. Waste treatment me	ethods
General information	Avoid the spillage or runoff entering drains, sewers or watercourses.
Disposal methods	Dispose of waste to licensed waste disposal site in accordance with the requirements of the local Waste Disposal Authority.
Waste class	When this coating, in its liquid state, as supplied, becomes a waste, it is categorised as hazardous waste, with code 08 01 11* (SOLVENT BASED LIQUID WASTE). Part-used containers, not drained and/or rigorously scraped out and containing dried residues of the supplied coating, are categorised as hazardous waste, with code 08 01 11* (SOLVENT BASED LIQUID WASTE). If mixed with other wastes, the above waste code may not be applicable. Used containers, drained and/or rigorously scraped out and containing dry residues of the supplied coating, are categorised as non-hazardous waste, with code 15 01 02 (plastic packaging) or 15 01 04 (metal packaging).
SECTION 14: Transport i	nformation
General	This product is packed in accordance with the Limited Quantity Provisions of CDGCPL2, ADR and IMDG.

14.1. UN number

UN No. (ADR/RID)	1263
UN No. (IMDG)	1263
UN No. (ICAO)	1263

14.2. UN proper shipping name

Proper shipping name (ADR/RID)	PAINT
Proper shipping name (IMDG)	PAINT

Proper shipping name (I	icao) pain	Т
-------------------------	-------------------	---

3

14.3. Transport hazard class(es)	
ADR/RID class	3
IMDG class	3

ICAO class/division

Transport labels

14.4. Packing group

ADR/RID	backing group	III
---------	---------------	-----

IMDG packing group

ICAO packing group

14.5. Environmental hazards

Environmentally hazardous substance/marine pollutant

14.6. Special precautions for user

EmS F-E, S-E

Tunnel restriction code (D/E)

14.7. Transport in bulk according to Annex II of MARPOL and the IBC Code

Transport in bulk according to Not applicable. Annex II of MARPOL 73/78 and the IBC Code

SECTION 15: Regulatory information

15.1. Safety, health and environmental regulations/legislation specific for the substance or mixture

EU legislationRegulation (EC) No 1907/2006 of the European Parliament and of the Council of 18
December 2006 concerning the Registration, Evaluation, Authorisation and Restriction of
Chemicals (REACH) (as amended).
Commission Regulation (EU) No 2015/830 of 28 May 2015.
Regulation (EC) No 1272/2008 of the European Parliament and of the Council of 16
December 2008 on classification, labelling and packaging of substances and mixtures (as
amended).

15.2. Chemical safety assessment

No chemical safety assessment has been carried out.

Inventories

EU - EINECS/ELINCS

None of the ingredients are listed or exempt.

SECTION 16: Other information

Abbreviations and acronyms used in the safety data sheet	ADR: European Agreement concerning the International Carriage of Dangerous Goods by Road.
	ADN: European Agreement concerning the International Carriage of Dangerous Goods by Inland Waterways.
	RID: European Agreement concerning the International Carriage of Dangerous Goods by
	Rail. IATA: International Air Transport Association.
	ICAO: Technical Instructions for the Safe Transport of Dangerous Goods by Air.
	IMDG: International Maritime Dangerous Goods.
	CAS: Chemical Abstracts Service.
	ATE: Acute Toxicity Estimate.
	LC_{50} : Lethal Concentration to 50 % of a test population.
	LD_{50} : Lethal Dose to 50% of a test population (Median Lethal Dose).
	EC ₅₀ : 50% of maximal Effective Concentration. PBT: Persistent, Bioaccumulative and Toxic substance.
	vPvB: Very Persistent and Very Bioaccumulative.
Classification abbreviations	Acute Tox. = Acute toxicity
and acronyms	Aquatic Acute = Hazardous to the aquatic environment (acute) Aquatic Chronic = Hazardous to the aquatic environment (chronic)
	Asp. Tox. = Aspiration hazard
	Flam. Liq. = Flammable liquid
	STOT RE = Specific target organ toxicity-repeated exposure
	STOT SE = Specific target organ toxicity-single exposure
Revision comments	Issued in new format for Reach compliance in accordance with EC 1272/2008 Issued in accordance with Annex II to REACH, as amended by Commission Regulation (EU) No. 2015/830 Unique Formula Identifier (UFI) added Addition of EU supplier information
Issued by	Technical Dept. (P.E.)
Revision date	27/01/2021
Revision	8.2
Supersedes date	27/06/2019
SDS number	10579
SDS status	Approved.
Hazard statements in full	 H226 Flammable liquid and vapour. H302 Harmful if swallowed. H304 May be fatal if swallowed and enters airways. H315 Causes skin irritation. H317 May cause an allergic skin reaction. H318 Causes serious eye damage. H334 May cause allergy or asthma symptoms or breathing difficulties if inhaled. H335 May cause respiratory irritation. H336 May cause drowsiness or dizziness. H361 Suspected of damaging fertility or the unborn child. H400 Very toxic to aquatic life. H410 Very toxic to aquatic life with long lasting effects. H412 Harmful to aquatic life with long lasting effects.
