

REFERENCE

Velodrome, Olympic Park, London

Application Field

- Floor coating

Structure Type

- Stadiums / arenas / sport facilities

Brief Description

The Velodrome is a unique venue in the Olympic Park in that it replaces an existing sporting facility that used to be on the site – the Eastway cycle circuit. The new purpose built track is 250m long, with a viewing capacity of 6000 seats within the Velodrome arena.

Main Problem and Requirements

A hardwearing coloured, matt floor coating system was required for the run off lane and central island to the track.

Client

London Olympics
