

Pegakote floor in a 17.000m2 Parking Garage

- Commisioned by* Laudy-van Wijnen V.O.F
Location Sittard, the Netherlands
Year 2007
Object type Parking Garage
Surface type Concrete
Total coated surface (sqm) 17.000m2
Used product(s): Pegakote
Description: The garage floor in Sittard is the biggest parking garage in the area, 17.000m2 surface to coat, a nice project for Rust-Oleum Mathys.
The floor is coated with:
- Pegakote (10% diluted with water)
 - Pegakote, with NS 200 for the anti-slip effect in all areas.
 - Rust-O-Thane Polyurethane 9200
- The recommended system provides both a very good protection for the floor and excellent anti-slip properties.
Painting company Heythuysen B.V. was very satisfied with the products from Rust-Oleum Mathys.
