Note:

MAPEI supplies the current annex along with the DoP to make the consultancy of the UK marking easier for the international clients. The enclosed UK marking can be slightly different compared to the one printed on the relevant packaging or documentation because of:

- *NPD (No Performance Determined) values can be omitted by the UK marking,*
- *graphic adaptations due to lack of space on the packaging or printing methods used,*
- *different language (the same packaging can be shared by several countries,*
- *the product is already in stock when the updating of the UK marking is implemented,*
- *printing mistakes.*
