

### **TBT Free Antifouling**

PRODUCT DESCRIPTION		Patented, TBT free, self polishing antifouling system incorporating unique Copper Acrylate SPC (Self Polishing Copolymer) technology.									
INTENDED USES	For use at N	For use at Newbuilding or Maintenance & Repair.									
PRODUCT INFORMATION	Colour		BMA664-Red, BMA668-Brown (BMA674-Red, BMA678-Brown for European Regulated Countries)								
	Finish/Sheer	1	Not ap	plicable							
	Part B (Curin	g Agent)	Not ap	plicable							
	Volume Solid	Solids		58% ±2% (ISO 3233:1998)							
	Mix Ratio		Not applicable								
	Typical Film	Typical Film Thickness		Range: 75 - 150 microns dry (129 - 259 microns wet) may be specified depending upon end use.							
	Theoretical Coverage		Range: 7.7 - 3.9 m²/litre at 75 - 150 microns dft, allow appropriate loss factors								
	Method of Application		Airless Spray, Brush, Roller								
	Flash Point (Typical)		Single Pack 27°C								
	Drying Infor	Drying Information		-5°C		5°C		25°C		35°C	
	Touch Dry [ISO 9117/3:2010]		7 hrs		4.5 hrs		2 hrs		1.5 hrs		
	Before Flooding		30 hrs		12 hrs		8 hrs		7 hrs		
	<ul> <li>Note For Major Refurbishment and Repair if total dft is &gt;300μm or a single coat is &gt;150μm dft, the flooding times must be increased as follows:</li> <li>24 hours at 10°C or less and 18 hours at 25°C or above.</li> </ul>

### **TBT Free Antifouling**

#### CERTIFICATION

When used as part of an approved scheme, this product has the following certification:

Product recognised by the following classification societies as compliant with the International Convention on the Control of Harmful Anti-fouling Systems on Ships, 2001 (AFS 2001):

- Bureau Veritas
- DNV
- Korean Register of Shipping
- Lloyds Register

Approvals issued by external bodies may be dependent upon formulation and/ or manufacturing site. Consult your International Paint representative for details.

SYSTEMS AND COMPATIBILITY

Consult your International Paint representative for the system best suited for the surfaces to be protected.

#### SURFACE PREPARATIONS

**Use in accordance with the standard Worldwide Marine Specifications.** 

All surfaces to be coated should be clean, dry and free from contamination. High pressure fresh water wash or fresh water wash, as appropriate, and remove all oil or grease, soluble contaminants and other foreign matter in accordance with SSPC-SP1 solvent cleaning.

#### NEWBUILDING

Interswift 6600 should always be applied over a recommended primer coating scheme. The primer surface should be dry and free from all contamination, and Interswift 6600 must be applied within the overcoating intervals specified (consult the relevant product data sheet).

Areas of breakdown, damage etc. should be prepared to the specified standard (eg. Sa2½ (ISO 8501-1:2007)) and primed prior to the application of Interswift 6600.

When high pressure fresh water washing at pre-delivery drydockings at newbuilding, consult your local representative.

#### MAJOR REFURBISHMENT

Interswift 6600 should always be applied over a recommended primer coating scheme. The primer surface should be dry and free from all contamination, and Interswift 6600 must be applied within the overcoating intervals specified (consult the relevant product data sheet).

Areas of breakdown, damage etc. should be prepared to the specified standard (eg. Sa2½ (ISO 8501-1:2007)) and primed prior to the application of Interswift 6600.

#### REPAIR

Application of Interswift 6600 over self:

Clean the entire area with close high pressure fresh water washing using a fan-jet lance held close to the surface (3,000 p.s.i., 211 kg/cm<sup>2</sup>) as soon as the vessel enters dock and before it dries out.

Consult International Paint for alternative methods of surface preparation.

Repair corroded areas with the recommended anticorrosive primer system and apply Interswift 6600 within the overcoating interval specified for the primer (consult relevant primer data sheets).

Application of Interswift 6600 over International Paint TBT-Free, International Paint Intersmooth SPC or competitors antifoulings:

Consult your International Paint representative for specific recommendations.

#### NOTE

For use in Marine situations in North America, the following surface preparation standards can be used: SSPC-SP10 in place of Sa2 $\frac{1}{2}$  (ISO 8501-1:2007)

### **TBT Free Antifouling**

I DI Free Antilouling	
APPLICATION	
Mixing	This material is a one pack coating and should always be mixed thoroughly with a power agitator before application.
Thinner	International GTA007. Thinning is not normally required. Consult the local representative for advice during application in extreme conditions. Do not thin more than allowed by local environmental legislation.
Airless Spray	Recommended Tip Range 0.46-0.66 mm (18-26 thou) Total output fluid pressure at spray tip not less than 176 kg/cm² (2500 p.s.i.)
Conventional Spray	Application by conventional spray is not recommended.
Brush	Application by brush is recommended for small areas only. Multiple coats may be required to achieve specified film thickness.
Roller	Application by roller is recommended for small areas only. Multiple coats may be required to achieve specified film thickness.
Cleaner	International GTA007. Choice of cleaner maybe subject to local legislation. Please consult your local representative for specific advice.
Work Stoppages and Cleanup	Thoroughly flush all equipment with GTA007. All unused material should be stored in tightly closed containers. Partially filled containers may show a viscosity increase of the material after storage. Material should be filtered prior to use.
Welding	In the event welding or flame cutting is performed on metal coated with this product, dust and fumes will be emitted which will require the use of appropriate personal protective equipment and adequate local exhaust ventilation. In North America do so in accordance with instruction in ANSI/ASC Z49.1 "Safety in Welding and Cutting."
	All work involving the application and use of this product should be performed in compliance with all relevant national Health, Safety & Environmental standards and regulations.
	Prior to use, obtain, consult and follow the Material Safety Data Sheet for this product concerning health and safety information. Read and follow all precautionary notices on the Material Safety Data Sheet and container labels. If you do not fully understand these warnings and instructions or if you can not strictly comply with them, do not use this product. Proper ventilation and protective measures must be provided during application and drying to keep solvent vapour concentrations within safe limits and to protect against toxic or oxygen deficient hazards. Take precautions to avoid skin and eye contact (ie. gloves, goggles, face masks, barrier creams etc.) Actual safety measures are dependant on application methods and work environment. EMERGENCY CONTACT NUMBERS: USA/Canada - Medical Advisory Number 1-800-854-6813 Europe - Contact (44) 191 4696111. For advice to Doctors & Hospitals only contact (44) 207 6359191 China – Contact (86) 532 83889090 R.O.W Contact Regional Office

#### LIMITATIONS

Overcoating information is given for guidance only and is subject to regional variation depending upon local climate and environmental conditions. Consult your local International Paint representative for specific recommendations. On immersion, colours will change:

Red -> Light Red

Brown -> Dark Brown/Black

At Maintenance & Repair, when overcoating exposed (polish through) areas of tar anticorrosives, a touch-up of Intertuf 203 should be applied prior to the application of Interswift 6600

Apply in good weather. Temperature of the surface to be coated must be at least 3°C above the dew point. For optimum application properties bring the material to 21-27°C, unless specifically instructed otherwise, prior to mixing and application. Unmixed material (in closed containers) should be maintained in protected storage in accordance with information given in the STORAGE Section of this data sheet. Technical and application data herein is for the purpose of establishing a general guideline of the coating application procedures. Test performance results were obtained in a controlled laboratory environment and International Paint makes no claim that the exhibited published test results, or any other tests, accurately represent results found in all field environments. As application, verification of performance and use of the coating.

In the overcoating data section 'ext<sup>\*</sup> = extended overcoating period. Please refer to our Marine Painting Guide - Definitions and Abbreviations available on our website.
