

PRODUCT DATA SHEET

Centrecoat Ultra 2 Pk Hygiene Coating

PRODUCT DESCRIPTION

Centrecoat Ultra 2 Pack Hygiene Coating is an extremely abrasion resistant anti-bacterial two pack epoxy resin coating designed for application onto floors and walls in high wear areas. Ideal for application onto many substrates including concrete, timber, primed steel, previously painted surfaces and more. Available in thousands of colours upon request.

PROPERTIES

- Very hard
- Exceptional abrasion resistance
- Resistant to oils and solvents
- Solvent free
- Almost odourless and easy to clean
- Kills many types of bacteria such as E.coli 0157, Listeria sp., Staphylococcus aureus, Salmonella, Shigella sp and MRSA.

RECOMMENDED APPLICATION METHODS

Apply by brush, roller or airless spray. 15 to 17 thou tip recommended. Mechanically mix both components together thoroughly before use. Substrate should be clean, dry and sound. Treat new concrete with diluted hydrochloric acid or proprietary solution before application and leave to dry thoroughly. Minimum application temperature: 8°C.

TECHNICAL

Appearance:	Semi-gloss.
Solids Content:	In volume: 48 - 50%. In weight: 64 - 66%.
Flashpoint:	Non-flammable.
VOC Content:	0 g/l max.
Cleaner:	Water.

COVERAGE

Theoretical Coverage For Walls: 6 - 7m² per Kg
Theoretical Coverage For Floors: 3 - 4 m² per Kg

AVERAGE DRYING TIMES

In still air conditions the following times can be achieved with a relative humidity of 60% at 20°C.

Touch dry:	9 hours.
Recoat:	24 hours.
Full Cure:	7 days.

RECOMMENDED PRIMERS

Porous substrates may be primed with a first coat of Centrecoat Ultra diluted by 10% – 20% with water.

PACKAGING

Centrecoat Ultra is a two pack product supplied in 4kg and 15kg quantities.

Shelf life: 18 months.
Store between 5°C and 35°C.
