

## O2 Arena, London

Contractors	Various
Location	O2 Arena, London
Architects	HOK Sport
Products	KEIM Concretal Lasur KEIM Roylan

Various Keim materials were used for this project due to their proven performance, sustainability and ability to overcome any visual imperfections in the concrete. Keim Roylan was applied onto the concrete block-work and in the ventilation towers and shafts due to its ability to withstand harsh environments. Keim

Concretal Lasur was used onto large areas of exposed concrete soffits, block-work and columns to unify imperfections, repairs and shade variations to give a high quality concrete effect without the look of a painted finish.
